

Fissure Trajectory:  
A Family of Curves and Surfaces

Travis Ortiz  
&  
Jay Schwartz

Once Nought, Twice Somewhat

Close your eyes and recount when you visited a dermatologist.

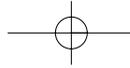

Please try to recount what he or she said not at the beginning, but before the middle of the visit.

Remember the sensations of pressure and pinch inflicted on your flesh.

Recall your first encounter with the concept of "Frankenstein."

Recall how you first perceived the serpent in the story of Adam's Fall.

Please carefully recall the physical details of the place where you understood that reptiles shed their skin.

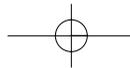

### Having Already Been There

Recall in your mind when you lost data in a computer malfunction.

Remember in snow when you sweat and the perspiration chilled as you stopped moving.

Bring alive in your mind the first time you experienced neck, wrist, or shoulder discomfort in front of a screen.

A Family, An Egg, A Glass of Boiled Water

Remember the first light upon  
waking

What is the sensory level of this  
particular memory?

Are you cold?

→ What temperature does this memory evoke

think of the spatial arrangement of ~~these~~  
three things

Remove the ~~self~~ self from that equation

Choose five words which describe this  
arrangement

...

Some eggs produce creatures with  
no visual ear openings  
— no lateral fringe

Nearly all reptiles are wary and  
secretive,  
Do not, however, take this as a license to  
destroy habitats

Check with state and federal wildlife  
representatives to learn what species are endangered

Call upon a thought which induces pleasure.  
a sense of well-being & security arises  
secondarily to this

Chimes Did Begin

If you've ever experienced a ringing in the ears from an extremely loud noise

A Weighing of X
